Hello everyone this is Bernard Sfez your Tiki specialist.
In this Tiki Express Tutorial we will see together how to create a Wiki page on Tiki.
if you don't know what is Tiki, what is Open Source or if you want to see more
of my video tutorials or know more about me, just check the description
down below and you will find links there. Of course as you know, like, share and subscribe.
As you can see, this is a brand new Tiki. I just logged as admin and in the left menu I go on the Wiki item, Create Wiki Page. I give it a name
and I press create a page. So now I can add some content.
A quick way to add a new page on the Fly is to use the Wiki Syntax. Between double parentheses you can put any text you want. My new second page should be my second new page whatever.
I just save and as you can see the link is in red and I'm invited to create this page.
