Tools and editing a wiki page in Tiki Wiki CMS

Tools and editing a wiki page in Tiki Wiki CMS

 Bernard Sfez - 2023-05-11 15:01

Let's learn the tools available when you edit a Wiki page in Tiki CMS Groupware.

Previous Wiki syntax tutorial: • The Wiki syntax in #tiki
What is Tiki: https://bernardsfez.com/Tiki-Wiki-the...
What is open source: https://bernardsfez.com/Open-Source-m...
Where to download Tiki: https://tiki.org/Get-Tiki

Hello everyone this is Bernard Sfez your Tiki specialist. In this Tiki
Express Tutorial we'll review together the tools available when you edit a Wiki page.
If you want to know more about Tiki. If you want to download Tiki. If you want to
know more about my support services on Tiki, look the description down below.
That's it, let's go.
I'm logged as admin on my wiki page and at the bottom of it I can see a list of buttons. Edit to edit the page. Rename that will change the name of the page. History that we will see together. Source that will show the real source code of the page. And a more button to Remove or delete the
page and Permissions to set the permissions of the page. We will see that in a future Tiki Express Tutorial. If I click on the edit page I got two tabs one for edit page where I can see a toolbar with different tools hovering them will display what they are doing for you. The text area and at the bottom a field to describe the change you made and that will be useful for the History feature that we will see in the future Tiki Express Tutorial. At the right hand I got the help pill
that display the wiki syntax tab. I made a video about that and I suggest you check the description
to find a link to this tutorial. And the plugin help I'll will do videos on the most used plugins on Tiki. At the bottom you got the Preview button, the Save button and the Cancel Edit... All those do exactly what they says.
